Satcom Direct Offers 500 minutes of Swift 64 service with Aero X™

Satellite Beach, FL, November 17, 2005—In a move extending its previous deadline, Satcom Direct, Inc. announced today that all new customers who activate their High-Speed Data terminals with Aero X™ High Speed Data service before February 28, 2006 will receive 500 minutes of Swift 64 service, at no charge.

The Aero X™ service is an exclusive, patent pending, Satcom Direct offering that enables corporate and military aircraft users to see an increase of 100-400% with Swift 64 data rates by installing the CNX-200 from EMS Satcom. This provides a significant increase in current Swift 64 data rates for its Inmarsat customers by using Satcom Direct's proprietary compression algorithms and EMS Satcom's Cabin Network Accelerator, the CNX-200, to obtain data speeds of up to 500kbps-1Mbps. Offering increased data rates worldwide, Satcom Direct's new Aero X™ technology solution is compatible with HSD systems from all major Satcom manufacturers including EMS, Thrane and Thrane, Honeywell, Rockwell Collins and Chelton. Since the introduction of Aero X™ in July 2005, Satcom Direct has activated nearly 10 customers and responded to more than 20 additional inquiries.

About Satcom Direct: Founded in 1997, Satcom Direct is the leading innovator of satellite voice, fax and broadband data service solutions. Its primary product, Global One Number (GON™), is an advanced connection service for aeronautical, maritime and land mobile applications that makes Satcom as reliable and simple to use as ground-based PBX telephones, and its proprietary Aero X™ service increases Inmarsat Swift 64™ data rates by up to four times.
