Satcom Direct Offers 500 minutes of Swift 64 service with Aero X

Satellite Beach, FL, September 16, 2005—Satcom Direct, Inc., is offering 500 minutes of Swift 64 service, at no charge, for all new customers who activate their High-Speed Data terminals with Aero X High Speed Data service until December 31, 2005.

The Aero X service is an exclusive, patent pending, Satcom Direct offering that enables corporate and military aircraft users to see an increase of 100-400% with Swift64 data rates by installing the CNX-200 from EMS Satcom. This provides a significant increase in current Swift 64 data rates for its Inmarsat customers by using Satcom Direct's proprietary compression algorithms, Expand Networks' patented application acceleration and EMS Satcom's Cabin Network Accelerator, the CNX-200, to obtain data speeds of up to 500kbps-1Mbps.

Offering increased data rates worldwide, Satcom Direct's new Aero X technology solution is compatible with HSD equipment from all major Satcom manufacturers.

About Satcom Direct: Founded in 1997, Satcom Direct is the leading innovator of satellite voice, fax and broadband data service solutions. Its primary product, Global One Number, is an advanced connection service for aeronautical, maritime and land mobile applications that makes Satcom as reliable and simple to use as ground-based PBX telephones, and its proprietary Aero X™ service increases Inmarsat Swift 64™ data rates by up to four times.
