Satcom Direct Launches FlightDeck Freedom™ Datalink Flight Information Service

New enabling technology is paired with 90-day voice offer for first 90 customers

Satellite Beach, FL, Sept. 25th, 2007— Satcom Direct, the industry’s premier satellite communications company, today announced the launch of a new datalink service, FlightDeck Freedom, which gives aircraft operators access to a menu of flight information content. This content includes pre-departure clearances (PDC), digital ATIS (DATIS), text and graphical weather, flight plans, flight tracking and text messaging provided by such Satcom Direct partners as Universal Weather®, Skyplan® and Air Routing International®. To help customers experience the benefits of FlightDeck Freedom (FDF), the service is being launched with a special ‘90/90’ promotion, giving 90 days of free Satcom voice communications to the first 90 FDF customers.

FlightDeck Freedom uses VHF, Inmarsat®, and Iridium® data networks to support Honeywell AFIS®, Rockwell Collins® RIU/CMU-4000, Teledyne Controls Telelink®, and Universal Avionics Unilink®. Satcom Direct also provides a customized EFB (Electronic Flight Bag) communications application

“For the first time, customers have a choice in enabling seamless communications to and from their aircraft,” said Jim Jensen; Founder/CEO of Satcom Direct. “Satcom Direct has created a number of such enabling services and technologies over the years, with the

purpose of making complex satellite communications easy for our customers to use. In fact, it's our passion is to develop advanced technologies that support our customers' missions," he added.

FlightDeck Freedom, available exclusively from Satcom Direct partners, will be sold via a number of different service plans, depending on the communications technologies installed on the customer's aircraft.

About Satcom Direct: Founded in 1997, Satcom Direct is the leading innovator of satellite voice, fax and broadband data service solutions. Its primary product, Global One Number™, is an advanced connection service for aeronautical, maritime and land mobile applications that makes Satcom as reliable and simple to use as ground-based telephones, and its proprietary Aero X™ service increases Inmarsat Swift 64™ data rates by up to four hundred percent.
