

SmartSky Networks

We are SmartSky ready

Satcom Direct® and SmartSky Networks have teamed up to deliver the new standard for air-to-ground (ATG) connectivity. With blazing new 4G technology, you get an airborne Wi-Fi connection that delivers streaming video, responsive internet access, email, voice calls, and text messaging – in real-time, at speeds rivaling that of terrestrial broadband connections.

SmartSky leverages the proven performance of a 4G beamforming-based wireless platform with the most substantial radio spectrum ever deployed in the aviation industry - all built upon the low-latency foundation of a secured air-to-ground network.

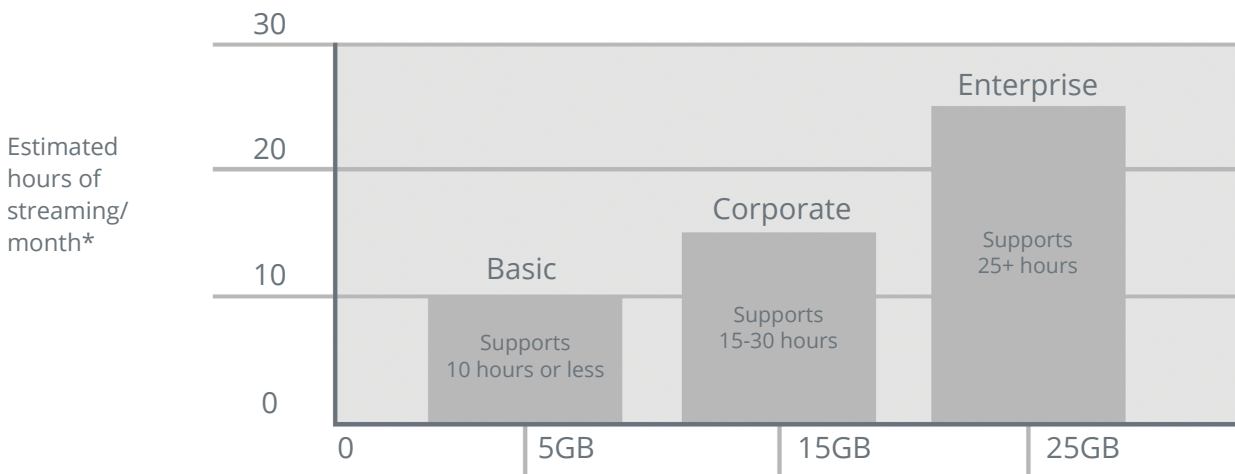

Satcom Direct is the exclusive distribution partner for SmartSky Networks, which includes our world class provisioning and support services. Be among the first to be SmartSky ready by scheduling your installation and selecting an introductory subscription plan to get you onboard.

SmartSky Key Features

- 4G beamforming-based wireless technology
- More than 10 times the speed and capacity of the current industry standard ATG network
- Real-time content streaming
- VoIP calling with your smartphone
- Text messaging including photos
- Video calling and conferencing

Estimating your monthly data usage

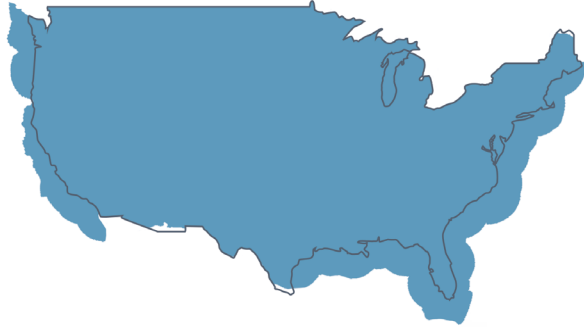

SmartSky delivers a true 4G experience enabling you to stream video in real-time plus talk, text, email, game and surf the web on multiple devices, simultaneously.

Data included with each subscription plan (GB)
Note: Streaming a good quality video uses roughly 300 MB/hour or more.
*Estimated hours are in addition to typical monthly usage.

SmartSky 4G Nationwide Coverage Map
