

Viasat Ku-Band Advanced

Offering enhanced high-speed internet service for business aviation

Viasat Ku-band high-speed internet delivers a worldwide, high-quality internet experience via the Viasat global network. With speeds up to 6.0 Mbps, you can browse the internet, send or receive email, videoconference, and stream media. In service since 2006 on hundreds of business and VIP aircraft, Viasat services deliver predictable monthly fees, a high-speed connection, generous data allowances, and are available during all phases of flight. Stay productive and entertained with Viasat in-flight internet.

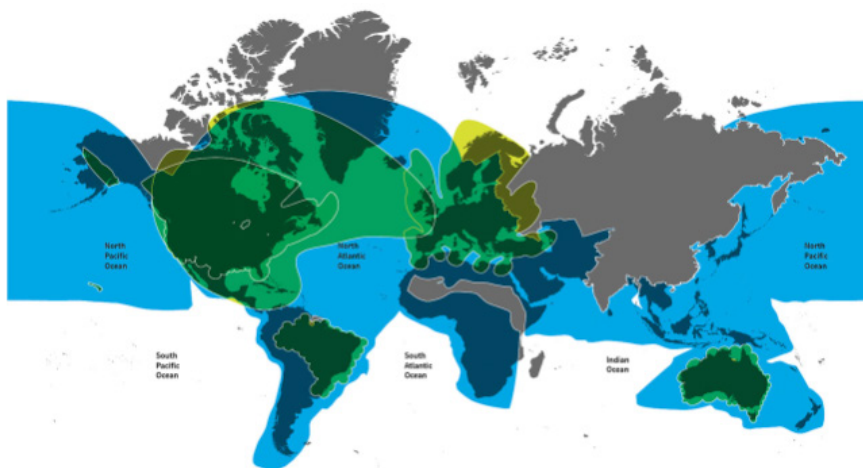

Take advantage of the increased speeds of Viasat Ku-band Advanced now with new pricing.

New service plans have recently been updated to increase data allocations by six-fold: 5 GB to 30 GB for the same price!

Applications supported

- Utilize SD AeroV® for VoIP calls
- Browse the web
- Email and messaging
- Connect to corporate VPNs
- Conduct video conferences
- Stream video and music
